☎ +82 8672 1446 | @ qkrtnqls1368@gmail.com | 🔗 LinkedIn | 📍 Daejeon, Korea

EDUCATION

KAIST, Graduate School of Metaverse

M.S.

Daejeon, Korea

Aug 2026 – current

Ulsan National Institute of Science and Technology, UNIST

B.S. in Electrical Engineering

Ulsan, Korea

Mar 2020 – Feb 2026

RESEARCH INTERESTS

Goal – Build physically grounded 3D/4D reconstruction of humans and scenes from sparse, noisy, and blurred observations, with the goal of creating high-fidelity digital twins using generative priors.

Keywords – 3D Reconstruction, 3D Human Modeling, Generative Models, Inverse Problems, Computer Vision, Computer Graphics

EXPERIENCE

KAIST SoC AMILab

Master Student

Daejeon, Korea

Aug 2026 – current

KAIST SoC AMILab

Intern

Daejeon, Korea

June 2025 – July 2026

- Project 3: Synthesizing animatable human head avatar from a single motion blurred portrait image
- Project 2: Reconstructing 3D scene from defocus blurred images.
- Project 1: Contributed to a 3D Gaussian human head avatar reconstruction project (CVPR 2026).

UNIST AIGS LAIT

Intern

Ulsan, Korea

Jul 2024 – June 2025

- Project 1: Developed Diffusion Posterior Sampling (DPS) method to reconstruct the blurry images of mouse brain cells and workshop paper was accepted by IPIU in 2025.
